Bid Schedule

Sl. No.	Description	Details
1.	RFQ No. and Date	CKYCR/2026/09/01
2.	Name of the Department	Solutions Delivery Group
3.	Brief Description of the RFQ	Selection of Software Solution Providers for Implementation, Installation and Maintenance of enterprise level comprehensive solution for CERSAI (CKYCR 2.0)
4.	Bank's Address for Communication	Nitins.Goyal@indusind.com / Abhijeet.davane@indusind.com
5.	Last Date, Time and Venue for Submission of Proposal (Technical+Commercial)	27-01-2026 before the close of business hours via Email.
6.	Mode of submission of proposal.	Email
7.	Timelines for implementation of the Solution	6 months from the contract signing date.

1. About Bank

IndusInd Bank is one of India's leading financial services brands and the preferred banking solutions provider for approximately 35 million customers across the country. The customers include individuals, large corporations, various government entities and PSUs, spanning across 2606 branches/ Banking outlets and 2875 ATMs spread across India, covering 1,38,000 villages. The bank has representative offices in London, Dubai and Abu Dhabi. The Bank offers a wide range of products and services for individuals and corporates, including microfinance, personal loans, personal and commercial vehicle loans, credit cards and SME loans and Gift City.

2. Definitions

- 2.1. 'Bank' means 'IndusInd Bank', described in more detail in paragraph 1 above and which has invited bids under this RFQ
- 2.2. 'RFQ' means Request for Quotation for Selection of Software Solution Providers for Implementation, Installation and Maintenance of comprehensive solution for CERSAI (CKYCR 2.0).
- 2.3. The firms, institutions & companies submitting the proposal in response to this RFQ shall hereinafter be referred to as 'Bidder'.
- 2.4. 'Contract' means the agreement signed by the successful bidder and the Bank at the conclusion of the bidding process, wherever required.
- 2.5. 'Successful Bidder'/ 'Selected Bidder' means the Bidder who is found to comply with all the Terms and Conditions of the RFQ.

3. About RFQ

- 3.1. Bank intends to Selection of Software Solution Providers for Implementation, Installation and Maintenance of comprehensive enterprise solution for CKYC process including CKYCR 2.0 guidelines.
- 3.2. The RFQ document is not a recommendation or invitation to enter the contract, agreement or any other arrangement in respect of the solution, unless a purchase order or notification of award is published by IndusInd Bank if any, as an end result of this RFQ process. The provision of the solution is subject to compliance to the selection process and appropriate documentation being agreed between the Bank and selected bidder as identified by the Bank after completion of the selection process.

4. Objective

IndusInd Bank invites bids from competent bidders to submit their response which fulfills the Bank's Requirements as per Annexure-II.

5. Requirement Details

Bank invites offers for Selection of Software Solution Providers for Implementation, Installation and Maintenance of comprehensive enterprise level software Solution for data submission followed by updates wherever required under CERSAI (CKYCR 2.0).

6. Scope of Work

6.1 IndusInd Bank is looking for the supply, Implementation, Installation and Maintenance of comprehensive software Solution for CERSAI Data submission including search, download, Data update and consuming PMLA updates. Data Submission covering following scenarios:

- Data capturing page of proposed solution given for branch users should validate PAN and Aadhaar number from NSDL and UIDAI sites.
- The proposed solution should be capable of fetching data and required attachments from CKYCR and pre fill the data entry screen of branch while on boarding the customer / modifying the existing customer profile.
- The system should be capable of capturing data of new / legacy account of individual and legal entities as per template of CKYCR / CKYCR 2.0.
- The Proposed solution should be capable of uploading customer documents such as photo, proof of identity, signature and proof of address into the application electronically with CKYCR system and auto setting has to be configured such as and passport or other Official Valid Documents - OVD will be as per the CERSAI specifications of CKYCR.
- The system should check the names of customers with the data base of Central KYC Registry, as per bank's requirement.
- If any value of particular field as per CKYCR template is not available in Bank's Core Banking Solution, the branch user will fill the required additional details in the proposed solution. So the proposed application should have sufficient data entry / upload module to accept the gap data for a single / multiple customers at a time.
- The Proposed solution should be capable to identify of customer at the time of on boarding.
- The Proposed solution should be capable of uploading data to CKYCR server and downloading data from CKYCR server.
- The Proposed solution should be capable of bulk uploading/downloading of required information and documents to CKYCR server in the compressed format as per the prescribed format of CKYCR.
- The Proposed solution should be capable of downloading customer data/document based on unique ID given by CKYCR of the customer/legal entities without human intervention

(integrate with Bank's in house software / Core Banking Solution / Intermediary staging system as per the Bank's requirement).

- The Proposed solution should be capable of providing an interface to search through API on CERSAI platform to check whether the required CKYC is present in CERSAI database or not.
- The Proposed solution should have built in ETL tool to extract, transform and load data from Bank's in house software / Core Banking Solution / Intermediary staging system for further process on daily basis at UCIC level.
- The Proposed solution should be capable of identifying the records automatically which are to be uploaded to CKYCR server.
- The proposed solution should be capable of validating the using banks existing bio metric system.
- The Proposed solution should be capable of mapping a new account to an existing customer automatically using business rules configured in the system. Such rules should be flexible and highly parameterized in the proposed solution. The rules can be added, changed or removed by Bank at any point of time and in case of customization required every time in the solution then there will not be any cost to Bank for this change request.
- The Proposed solution should be capable of picking up unlimited address types and number of address along with contact numbers and email details. Address change of the customer through this solution should be maintained in a user friendly and readable manner with the account linkage.
- The Proposed solution should be capable of capturing any future field or requirement by CKYC Registry, Regulators or Banks, from time to time.
- The Proposed solution should be capable of sending the information as per the escalation matrix for non-uploading of document or information in stipulated time given by CKYCR to different levels as per Bank's requirement.
- The Proposed solution should be capable of providing details to Bank and other monitoring authorities for progress/pendency of the work of screening/scrutiny of the work under correspondence with the field functionaries.
- The Proposed solution should be capable of maintaining proper history of uploading of customer data.
- The Proposed solution should be capable of receiving notification/deficiency from CKYCR and will give email to respective branch/Ops / user under copy to administrator/Regional Office user/Central Office user.
- The proposed solution should have seamless integration (API/Web service/Banks API Gateway) with CBS (Finacle / Craft Silicon (Ganaseva) / Vision Plus / Prepaid Instruments / Demat / Pragati etc.) and document management system.
- The proposed solution should be implemented as per current CERSAI CKYCR 2.0 specification. It should also include all future changes/modification as per CERSAI guidelines CKYCR 2.0

Hardware:

- a) At present the Bank opens around 5 lac NTB customers (individuals and corporate customers) every month with an update of 2 lac customers update the same is expected to grow by 15-20% every year.
- b) The CKYCR will be implemented at the centralized solution in the bank however there will be multiple upstream / downstream platforms provide the data for further submission and download with CERSAI. Hence, the vendor should assess and specify the hardware size required for DC and DR centers, and should be scalable to meet the growth in the next five years.
- c) Around 700 to 800 users will be accessing the system simultaneously.
- d) The vendor should assess the required hardware capacity in terms of hard disk and RAM as around 700 to 800 users will be accessing the system simultaneously.
- e) The vendor should assess the required hardware capacity in terms of hard disk and RAM.
- f) The solution should support all leading database servers including Oracle, SQL Server with data pull and push capabilities.
- g) Solution should support the complete CKYCR 2.0 API stack accessible through Banks API Gateway to perform all operations of data submission, search, download and update actions.

Infrastructure

The Vendor needs to size the infrastructure (hardware, Operating System, Database, Networking equipment and other related software etc.,) for the solution based on the volume and the growth indicated in the Annexure II – Technical Requirement (Project Scope) and propose the same as part of their technical bid submission. Bank may use existing IT infrastructure or procure separately the required infrastructure based on the sizing proposed by the vendor.

However the complete implementation, maintenance and support of the Centralized KYC Registry Solution shall be part of the scope of the vendor.

As part of the technical proposal the vendor needs to provide complete Centralized KYC Registry Solution details. The vendor must design the solution with high availability & secure Infrastructure in Data Centre and Disaster Recovery site as per Industry accepted security standards and best practices.

The Application & Database should be sized for Active- Active cluster at DC & Active-Active cluster at DRC so that the solution and infrastructure can fall back on each other. DC - DR replication should be available as part of the solution so that in case of switch over the complete solution should seamlessly work.

Vendor needs to accordingly provide as part of the technical solution the complete IT infrastructure details like Server, Operating System, Database, Storage Capacity, networking and other related requirements. The details should include.

1) List of Operating Systems (OS) and Databases (DB) on which the solution is compatible along with licensing details of the OS and DB for the complete solution (Including installations and replication at DC and DR).

2) Details of redundancy and security setup

- 3) Application architecture along with a detailed diagram including the infrastructure setup.
- 4) Implementation procedure / road map.
- 5) Server and related infrastructure specification required as part of the solution implementation (for both UAT and production phase) along with the quantity to meet the Bank's redundancy requirement.

The Vendor is responsible to arrive at the sizing independently based on the volume and the growth indicated in the Annexure II – Technical Requirement (Project Scope). The Bank is not responsible for any assumption made by the Vendor with respect to the sizing. In the event the sizing proposed by the Vendor does not meet the performance / service levels of the Bank the Vendor will at their cost carry out the necessary upgrades / replacements. The Bank has the right to deduct / recover from the vendor the required additional expenses which Bank may incur on account of such upgrades / replacements.

license on proposed Solution (Centralized KYC Registry Solution covering CKYCR 2.0)

The license for the solution to be Enterprise wide perpetual level for all the modules offered without any constraint on number of branches or users for the Bank's Operations in India & International Territories, present & future subsidiaries and associates both domestic & international and present & future RRBs. The Vendor will supply, implementation, maintain and support the complete Centralized KYC Registry Solution.

6.2 Proposed solution should be sufficiently scalable and capable of handling the increased volumes after integration of transaction systems (CBS) / Other platforms of amalgamated entity along with Gift City etc.

6.3 Solution shall carry recon functionality about the data flow with multiple systems of bank and in case of any breakage in dataflow system generated respective notifications to the monitoring / IT support teams.

6.4 Migration of the current customer/account / UCIC / transaction etc. data from all the bank internal / external systems to the proposed solution.

6.5 Solution shall cater the functional / Technical / It Security requirements stated under Annexure II / III.

6.6 Bidder shall provide support for training, trouble shooting, capability to scale up, configuration management, logging capabilities documentation such as data flow diagram, architectural diagram, structure user manual and implementation architecture.

6.7 The Bidder is required to supply & install all the required Application Software with enterprise level licenses to commission the Solution. However, the Bidder must inform the hardware requirement with detailed specifications required for implementing the solution.

6.8 The Vendor should maintain Uptime of 99.95% of the Solution both at DC & DRS during contract period and the solution should have response time should be as per industry standards, once fully automated. System should be capable of generating Alerts 24x7x365.

6.9 The architecture of the solution should allow Bank's system to be easily integrated and the technology used should be easily adoptable and portable to the Bank's system. In case any Customization is required by the Bank in any functionality of the solution within one year of complete implementation (i.e. one year from sign-off), the same is to be done by the bidder without any cost to the Bank. Beyond the period of one year from sign-off, Customization cost will be paid as per the Commercial bid (Customization cost Finalized). Customization charges will only be paid for any such requirement which is not mentioned in the Scope of Work or Technical/Functional specification / Security requirement of the solution as in the RFP. Any customization done in the solution as per Bank's requirement shall become part of Bank's intellectual property and Bidder shall not provide the same functionality to any other Organization. Failure of which will constitute a breach of the Non-Disclosure Agreement and Bank may take necessary action against the bidder as per the NDA.

6.10 The solution is required to integrated with Bank's CBS, EDW (all output sources), etc., without any extra cost to the Bank. In case, there is requirement of integration of the solution with any existing or new channel, within one year of complete implementation (i.e. one year from sign-off), the same is to be done by the bidder without any cost to the Bank. Beyond the period of one year from sign-off, Customization cost will be paid as per the mutual agreement with bank.

6.11 The Solution should have capability to integrate with Fintech Companies/Data Aggregating Companies providing external data for e.g. bank partners like FIXERA, Airtel, Bank Bazaar etc.

6.12 Successful Bidder is required to mandatory impart training of at least 5 days to 100 identified bank personnel, without any extra cost to the Bank, in Bank's premises, after implementation of the solution.

- a) The training should cover configuration, operation/functionalities, maintenance, support and administration for software/ database/ OS/ Middleware, application architecture and components installation, troubleshooting processes, complete knowledge transfer for handling the application, reporting aspect or regarding any new feature/update etc., of a proposed tool/ software, The training should contain complete & exhaustive knowledge of the solution (both classroom and hands on mode) and should be such that the trained personals can in turn train other staff members as well i.e. trainer's training.
- b) The training is to be provided by technically qualified person having at least 5-7 years of experience of working of the solution.
- c) In case any additional training is required during the contract period, the same should be provide by the bidder. Separate commercials have been called for the same. Bank will place separate purchase order, as and when required. Bidder will impart training at Bank's Premises.
- d) Bidder is also required to provide well documented training materials (E-learning material, guidebook, handouts, training manuals etc.) for different personnel involved in this process. And Develop content for the Bank to train personnel on an ongoing basis.

- e) In case any customization is done in the solution during the contract period, Bidder is required to provide atleast 1 day training for the same, without any extra cost to the Bank.

6.13 Bidder will have to comply with all the present and future provisions of the Information Security Policy/NPCI Guidelines/Guidelines of RBI, Respective Govt. Agencies and the Bank and provide such regulatory requirements at no additional cost to bank during the warranty and ATS/AMC period. The Solution may be audited by RBI/any other Regulatory Authority and any observation pointed out by these bodies have to be complied by the vendor within the timelines stipulated by the regulatory agencies, without any additional cost to the Bank. The offered solution shall be subjected to Bank's audit (VAPT, EAPT, IS Audit et.) through off-site and on-site scrutiny at any time/periodically during the contract period. The auditors may be internal/ external. The system should have Audit Log for all Admin and user operations and should be capable of keeping Audit trail as per Bank policy. The vendor should provide solution and implementation for all the audit points raised by bank's internal/external team during the contract period, within the stipulated timelines, without any extra cost.

6.14 Bidder has provided all the necessary documentation relating to the implementation including, but not limited to the following:

- Project Charter
- Solution Architecture and Design
- Architecture / Technical diagrams/User manuals
- System flow documentation
- Technical manuals
- Training Manuals
- UAT Test and other Tests scripts
- Standard Operational Procedures
- Manuals should be provided in printed duly hard bounded form and 2 sets in soft copy duly labeled and indexed working CD / DVD.
- All installation and configuration reports, documents, diagrams, etc. are to be supplied before commissioning.
- Documentation of standard operating procedures for EWS.

6.15 Successful Bidder has to carry out the following activities w.r.t the solution.

a) User Management

- Set up and manage admin and user accounts as per policies of organization.
- Manage and restrict users as per the assigned roles & responsibility.
- The maker checker concept will be followed while creating users.

b) Configuration Management

- Configuration and Management of Interface addresses, routing information, routing tables, Multicast configuration for the Device operations.
- Patch implementation.

- Detailed architecture covering hardware/ software/ OS/middleware/database, etc. as per specific requirement of the project.
- Backup of configuration.
- Configuration backup before making any changes.
- Documentation of change management.
- Disaster Recovery Management.

c) Compliance to Bank's IS Security policy

1. Responsibilities for data and application privacy and confidentiality.
2. Responsibilities on system and software access control and administration
3. Physical security of the facilities.
4. Physical and logical separation of data from other customers of the bidder i.e. the data should be kept on Bank's premise or any place decided by the Bank and Non-Disclosure agreement should be signed to prevent leakage of information and knowledge.
5. Incident response and reporting procedure.
6. Password policy of the Bank.
7. Data Encryption/Protection requirement of the Bank.
8. Backup/Recovery solution should be part of the total solution. The bidder should integrate the tool/software with the existing systems as per requirement of Bank and carry out thorough system integration system testing.
9. System integration testing will be followed by user acceptance testing, plan for which has to be submitted by bidder to the Bank. The UAT includes functional test, resilience tests, benchmark comparisons test, load test etc. IndusInd Bank staff / third party vendor designated by the Bank will carry out the functional testing. This bank staff / third party vendor will need necessary onsite training for the purpose and should be provided by the bidder. The bidder should carry out other testing like resilience/benchmarking/load etc.
10. Bidder should submit result log for all testing to the Bank.
11. On satisfactory completion of aforementioned test, the user acceptance test (UAT) letter will be issued to the bidder by the Bank.

7. Project Timelines

Customization, Implementation & Production live of the software solution completed inline to bank governed timelines.

8. Selection of Bidder

The Bank will scrutinize the bids received from the bidders to determine whether they are complete in all respects as per the requirement of the Bank. Bidder to comprehend each of the stated requirements on following lines.

- Out of the box
- Configuration

- Customisation – high, medium low

9. Migration

9.1 The Bidder along with the bank shall formulate the data migration strategy for migrating the customer data from different systems /existing CKYC platform to the proposed solution.

9.2 Bidder will be responsible for providing necessary tools & support services for the migration of customer data from different systems of the Bank to the proposed solution including the first time Master Data creation.

9.3 The Bank will coordinate with different vendors/bank's teams to enable the migration process to the proposed solution.

10. Evaluation of Bids

The Bank will evaluate the bids submitted by the bidders under this RFQ basis functional, technical and commercial viability. Bidders to convey both On Prem and SaaS models.

11. Product Demonstration

12.1 The Bank reserves the right to call for a presentation on the features and functionalities as a Part of Technical Proposal evaluation.

12.2 The evaluation committee of the bank will evaluate the requirements mentioned in scope of work. Bidder has to showcase the details mentioned in RFQ.

12.3 Setting of evaluation criteria for demonstrations shall be entirely at the discretion of the Bank. The decision of the Bank in this regard shall be final and in this regard, no correspondence shall be entertained.

12. Acceptance of Offer

12.1 The Bank reserves its right to reject any or all the offers without assigning any reason thereof whatsoever.

12.2 The Bank will not be obliged to meet and have discussions with any bidder and/or to entertain any representations in this regard.

12.3 The bids received and accepted will be evaluated by the Bank to ascertain the best and lowest bid in the interest of the Bank. However, the Bank does not bind itself to accept the lowest or any Bid and reserves the right to reject any or all bids at any point of time prior to the order without assigning

any reasons whatsoever. The bank reserves the right to re-tender the RFQ with or without modifications. The Bank shall not be obliged to inform the affected bidder(s) of the grounds for the Bank's rejection.

13. Award of Contract

The contract shall be awarded and the order shall be placed on the selected Bidder.

14. Warranty

14.1 All support & services required to supply, install, develop, configure, customize, test, implement, integrate and maintain the platform solution, as described in RFQ, will be the part of the project deliverables during the contract period (under warranty).

14.2 The warranty would be on-site and comprehensive in nature. Warranty period will apply to each product separately and will start from the date of deployment of the system mentioned in the segment and will be valid for a period of 6 months. The successful bidder shall provide maintenance and support under warranty, without any extra cost, for a maximum period of 6 months from the Go-live of each product. Bank will not pay any charges towards ATS during the warranty period.

14.3 The successful bidder should guarantee that the software supplied to the Bank is licensed and legally obtained. All software must be supplied with their original and complete printed documentation. The successful bidder shall be fully responsible for warranty of all the system components i.e. software in respect of proper design, quality, material and workmanship of the equipment, accessories etc. covered by the offer.

15. Training

The Successful Bidder / Vendor shall organize for training (familiarization) to the Bank's team as per Point# 6.12 mentioned in Scope of Work

ANNEXURE I

Eligibility Criteria

(Procurement to update)

ANNEXURE II

Technical & Functional Parameters

Functional and Technical scoring will done on following criteria as part of Functional evaluation.

S. No	Description	Bank's Requirement (Mandatory Parameter)	Bidder Response (RA / CU / UA)	Documentary evidence / configuration details to achieve the functionality
1	The software application should have the capability to Pull and push the data From / To Source platform or the Queue mechanism as per bank's agreed timeframe / frequency, and as per the prescribed format, confirming to the template duly validated, in respect of all the customers opened / updated by bank on the previous day / Same Day / real time / near real time basis.	Mandatory		
2	Solution shall have the capabilities to enhance the downloaded images and store it with banks DMS (Document Management) system and shall be easily retrievable during the inquiry / audit situations. Same holds true for the uploaded images, further images shall be duly enhanced inline to CERSAI prescribed in case bank is not upscale or a downscale images.	Mandatory		

3	The software application should have the capability of aligning the data upload inline to CKYCR 2.0 with a queue based mechanism to handle the CERSAI downtime / Banks EOD / BOD situations.	Mandatory		
4	Proposed system shall possess All the data uploaded and downloaded (Including PMLA updates) with CERSAI shall be appropriately recorded in the application DB layer for future use retrieval along with the mechanism to record customer consent.	Mandatory		
5	Success Records: Wherever the uploaded files are accepted by the CERSAI successfully, the software application should have the capability to – a) Generate a daily report file showing details like customer id, customer name and the unique 14- digit KYC identifier number allotted by CERSAI. b) Based on this report, the 14-digit KYC identifier number is to be Pushed to the bank's queue or upstream a platform for updating the same in the respective customer profile. Download Records: The software should also have the capability to download the KYC records of the customer who are already having banking account with other	Mandatory		

	banks, on providing the 14 digit KYC Identifier issued by CERSAI. (Unique KYC identifier numbers are allotted by CERSAI under two scenarios viz. (1) where the party is a new customer opening banking account for the first time and (2) where the party is already having banking account with some other bank. In 2nd flow if there is an update required then the same shall be processed. By comparing the data with CERSAI downloaded record. Error Records: Wherever there is failure in uploading the file, the application should have the capability to – • read the response file and show the error message or error description for the given error code • provision to transmit the error messages to the respective Ops team for rectification / clarification wherever manual intervention is needed • re-upload the rectified records (Single Record / Bulk) to CERSAI thereafter • maintain the history of error records			
--	--	--	--	--

6	Probable match: On uploading the KYC records, where there is no match or exact match exists, Banks will be provided with the 14 digit KYC Identifier. Where a probable match exists for the KYC data uploaded, the records will be flagged by CERSAI for reconciliation by the banks. The software should have the capability of – • Identifying and displaying such probable match cases flagged by CERSAI for reconciliation by the Bank. • Transmitting such probable cases to the respective branches/RO/ZO for reconciliation/ resolution by the branches, wherever branch intervention is needed. • To download the KYC records from the CERSAI server, if probable match cases are found to be an exact match • To forward such cases to CERSAI, if probable match cases are found to be no match. • The reconciliation of „probable match“ cases should be completed within 5 working days, beyond which such records will be withdrawn by CERSAI. Hence, the software should have the capability of generating a report indicating details of such cases and a auto resubmission of records back to CERSAI.	Mandatory		
---	--	-----------	--	--

	Image match / KYC Documents based automatch functionality shall be			
7	The software application should have the capability for data submission as mentioned above, in respect of legacy customers and all customers being opened.	Mandatory		
8	The Software should have the capability for uploading the files in respect of both individual / Non-Individual (legal entities), as mandated by RBI / GOI / IBA/ CERSAI. In case the field structure is different for the above entities, the same should be taken care of including IFSCA registration etc.	Mandatory		
9	The software should have a provision to attach digital signatures to the bulk files while uploading to CERSAI server	Mandatory		
10	The software application should support complete CKYCR 2.0 guidelines covering the API stack.	Mandatory		
11	The software application should also support the existing source platform / intermediary staging platform version as well as any future upgrades.	Mandatory		

12	The solution should support multiple Windows, browser versions working in bank.	Mandatory		
13	The vendor should have proper license to use third party software, if any, and bank will not be liable in the event of any legal complications arising out of it. Proof of license should be provided to the bank, in such cases.	Mandatory		
14	The software should not change any configuration of PCs / Desktops etc wherever utilized and follow bank security guidelines.	Mandatory		
15	The software application should adhere to and comply with bank's password policy enforcement with multi factor authentication	Mandatory		
16	Maker-checker must be available wherever manual intervention authentication is envisaged.	Mandatory		
17	The software application should conform to all regulatory, statutory, legal acts and rules including IT and cyber security norms with subsequent amendments.	Mandatory		

18	The vendor should provide support, if the Bank switches over to any other application for implementing CKYCR.	Mandatory		
19	Vendor should provide complete product user manuals, technical manuals to the Bank for future reference, guidance and use.	Mandatory		
20	The vendor should provide training to the officials of the user department (CKYC Cell/ Ops staff / IT) for matters related to technical aspects,	Mandatory		
21	The vendor should also provide training to additional staff members working at training centers/ branches, if required, as per exigencies to fulfill the CKYC compliance by the Bank.	Mandatory		
22	The activities of every user in workflow should be logged by the system automatically for each record and the same should be available for audit trails. For the management system, all activities at admin console should have an audit trail of all logon attempts and operations. Confidential Logs should be tamper-proof. Tools should be provided to check the integrity of logs	Mandatory		
23	The software application should have real-time MIS / Reports portal, duly displaying the details of customers uploaded,	Mandatory		

	approved, rejected in the workflow. It should provide details to Bank/ monitoring authorities on the progress/ pendency of work and scrutiny of work with field functionaries. It should also have the ability to add new reports as and when required. Reports of rejected / error records shall be downloadable by concerned user department with clear action on the field and error/rejection description. CERSAI governed Data Submission timeline reports (e.g. T+7 , Probable Match, t+1 , T+10 for NTB T+1 & T+7 for ETB etc.) shall be readily available in the software application. Report shall be downloadable in pdf, excel, csv etc. formats			
24	The selected bidder should provide support for Data archival, retrieval and purging as per the requirement of the Bank.	Mandatory		
25	Bidder has to provide hardware sizing and the Solution requirement (including OS, Application/ Web / Database Server, Browsers, etc..) for the solution. The solution should handle uploading of customer data to CERSAI portal without any down time. The application solution should be able to handle the above requirements. The bidder must take into account the above points and suggest the size of the hardware at the commencement of the project itself and ensure that the	Mandatory		

	resource utilization is always within 70% at any point of time.			
26	The system must be scalable to initially for a minimum 50K NTB customers and 30k ETB customers per day and going forward without any limitation to accommodate new branches/offices /software's/use and also for handling bulk volumes of legacy data. Presently Bank having customer base of approx. 8 crores which includes data of approx. 7 crore (From 1st Jan 2017 to 31.12.2025) 15% growth in customer base YOY.	Mandatory		
27	The selected bidder shall own the responsibility to demonstrate that the services offered are as per the specification/performance stipulated in this document and as committed by the bidder either at site or in bidder's work site without any extra cost to the Bank.	Mandatory		
28	The broad scope of project envisages a complete solution for Central Know Your Customer Registry which includes supply, installation, design, sizing, customization, configuration, integration, maintenance, support of the software and other components required. This would also envisage parameterization, historical data management, verifying data quality, migrating data, user acceptance testing,	Mandatory		

	documentation, trainings, knowledge transfer and support.			
29	The proposed CKYCR / CKYCR 2.0 Software should meet the present/ future guidelines of Government/ Regulatory Bodies / CERSAI etc.,	Mandatory		
30	The Bidder should Install/re-install, configuration/re configuration of CKYCR application, OS, Database & other software/utilities/Drivers for Production, UAT and Archival setups during the contract period and also maintain and support the present/future proposed interfaces to CERSAI should be provided without any additional cost to the Bank.	Mandatory		
31	Bidder should identify dedicated technical support co coordinators who would provide technical support to the Bank's team and ensure smooth completion of day to day activities. Support should be available on Onsite/ Offsite currently at DC / DR / Support centers of Bank on all Business days during 08:00 to 20:00 Hours to the Bank. If bidder is not able to resolve the issue then the bidder has to visit to the Bank's premises for resolving the same at no extra cost to the Bank. The support should be available on call also.	Mandatory		

32	The licenses for the proposed solution should be enterprise wide and there should not be any restrictions in issuing licenses based on no of users, no of branches, no of channels integrated, no of systems integrated, API Calls, no of uploading/downloading documents or transactions or files and asset size of bank etc..	Mandatory		
33	The proposed solution should be capable to perform the data handling at the UCIC level.	Mandatory		
34	The proposed solution should be capable of providing an interface to search through API on CERSAI platform to check whether the required CKYC is present in CERSAI database or not.	Mandatory		
35	Any changes to be carried out in the CKYC Application due to various direction issued by Regulator / Statutory body etc which require API's, Should be provided by successful bidder, during the entire contract period.	Mandatory		
36	The proposed solution should be capable of sending the information as per the escalation matrix for non-uploading of document or information in stipulated time	Mandatory		

	given by CKYCR to different levels as per Bank's requirement.			
37	The proposed solution should be capable of receiving notification / deficiency from CKYCR and will give email to respective Ops Users.	Mandatory		
38	The proposed solution should be capable to send SMS/ email alert to respective customers. It should have a workflow and all interaction with www.ckycindia.in or the CKYCR system should happen through secure FTP (File transfer protocol) and SSL (Secured Sockets Layer). Bank's SMS and email gateway details will be disclosed separately with successful bidder.	Mandatory		
39	Detailed process documentation, Standard operating procedures and management of solution should be created and submitted to the bank.	Mandatory		
40	Solution shall have the capability to validate the provided data with Images OCR and AI ML capabilities to ensure the integrity of uploaded images.	Mandatory		
41	Solution shall cater all the CKYCR 2.0 API needs with the proper logging of each of the request / response in the application DB layer for future reference / audit purposes.	Mandatory		

41	Solution shall have the capability to switch the CERSAI data submission / download / update API in Asynchronous / Synchronous mode.	Mandatory		
42	Solution shall have an extensive Dashboard capability to showcase a complete end to end flow of the records right from the insertion to the workflow to its completion. Functionality to download the respective records from the dashboard shall be facilitated in pdf, excel, csv etc. formats	Mandatory		
43	Provided System shall have an extensive Reconciliation mechanism with CERSAI specifically where the financial implications exist i.e. currently linked with initial search and Download followed by subsequent search and download and updates.	Mandatory		
44	Solution/System shall have a Reconciliation process that given the status of records entered in the CKYC process and completed the process or in progress work-step wise.	Mandatory		
45	Solution shall have the exception Handling process manually for individual records or in bulk to handle the records if any stuck in any exception. There shall be no stage or workstep where the records are not moving to completion stage.	Mandatory		

	Addressal of exception w.r.t. changes from CERSAI on CKYC number due to merging of multiple CKYC shall be notified and handled. Invalid CKYC during modified records shall be appropriately addressed. Handling of Junk Characters / CERSAI rejections shall be appropriately prior to data submission to CERSAI.			
46	Solution shall have the Queue Handling process so that the concerned Ops team is able to perform actions as per the respective applicability of the roles and the rights given. Same holds valid for across any work-step / Queue etc.	Mandatory		
47	Solution shall have an extensive Dashboard & MIS capabilities so as to showcase a complete end to end flow of the records right from the insertion to the workflow to its completion.	Mandatory		
48	Solution shall support all the File Formats for image uploading i.e. solution shall convert the images provided by bank to CERSAI acceptable format.	Mandatory		
49	Solution shall support data encryption to avoid data leakage and .	Mandatory		

50	Bank will provide raw data values and solution shall formalized the data as per CERSAI guidelines for further submission	Mandatory		
51	System shall possess AI/ML, fuzzy logic capabilities in Data, image comparison, PI /POA proof during the process and to handle the situation so that same document shall not be submitted across multiple records.	Mandatory		
52	System shall not possess any dedupe activity to halt the process workflow. However, system shall be capable of UCIC based handling of records. Records matched under same UCIC shall be stored, processed	Mandatory		
53	Proposed System shall possess different queues for: Consumer Banking: • Retail - NTB & ETB (modification) • Retail- unsolicited (PMLA) updates • Corporate - NTB & ETB (modification) • NR / PIO / foreign National – NTB & ETB • Minor – NTB & ETB • Recording Customer consent Portal for PMLA updates / search and download. GIFTCITY – IFSCA Guidelines • Retail - NTB & ETB (modification) • Retail- unsolicited (PMLA) updates	Mandatory		

	- Corporate - NTB & ETB (modification) - NR / PIO / foreign National – NTB & ETB - Minor – NTB & ETB - Recording Customer consent Portal for PMLA updates / search and download.			
54	Software application shall possess processing of records from multiple source platforms with different supported lookup master values like POI / POA / Customer types, Constitution etc.	Mandatory		
55	Proposed system shall possess: - Adhoc search and download capabilities along with recording customer consent / OTP for processing. - Manual Data submission capabilities through an upload with all the desired values including related party details wherever applicable. - Correction of any data values in bulk / manual - Discard the records from any work-step/stage and repush the record as a fresh in workflow. - Record processing history shall be downloadable in Excel, pdf etc in readable formats with all the users details, events, datetime stamp.	Mandatory		

Scoring methodology for functional parameters:

Feature Status	Short Form	Remarks
Readily Available	RA	The feature is already supported and included in the out-of-the-box solution (3 Marks shall be allotted)

Customization	CU	Can be developed / customized and delivered along with the Solution, prior to implementation at no extra cost. (1 Mark shall be allotted)
Not supported / Unavailable	UA	This capability is neither supported nor available with this Solution. (No Mark shall be allotted)

Please Note – During Demonstration if any of the required features are not demonstrated but the same feature has been mentioned as “Readily Available (RA)” as part of Technical Scoring Sheet then the same shall be changed to “No Marks (Not Supported / Unavailable)” in the Functional and Technical Scoring Sheet

ANNEXURE III

Service Levels

The Vendor understands the largeness of this Project and that it would require tremendous commitment of financial and technical resources for the same, for the tenure of Contract under this TENDER. The Vendor therefore agrees and undertake that an exit resulting due to expiry or termination of Contract under this TENDER or for any reason whatsoever would be a slow process over a period of six (6) months, after the completion of the notice period, and only after completion of the Vendors obligations under a reverse transition mechanism. During this period of Reverse Transition, the Vendor shall continue to provide the Deliverables and the Services in accordance with the contract under this TENDER and shall maintain the agreed Service levels. The Bank shall make payment for these services as per terms. The Bank expects that the successful Vendor to adhere to the following minimum Service Levels:

- Any fault/ issue/ defect failure intimated by Bank through any mode of communication like call/e-mail/fax etc. are to be acted upon, so as to adhere to the service levels. Business/ Service Downtime and Deterioration shall be the key considerations for determining “Penalties” that would be levied on the Successful Vendor.
- The Vendor should have 24X7 monitoring, escalation and resolution infrastructure.
- Time bound problem addressing team (onsite / offsite) for the complete **contract period**.
- Vendor to arrange for updation required in the system to meet the changes suggested by RBI/ Govt. of India/ regulatory authorities towards compliance as part of ATS at no extra cost to bank for the entire contract period. Any delay in meeting the timelines would result in penalty.
- Vendor will have to guarantee a minimum uptime of 99.5%, calculated on a monthly basis. Application availability will be 99.5% on 24x7x365. The penalty will be calculated as per the details given below.
 - Uptime percentage - 100% less Downtime Percentage
 - Downtime percentage - Unavailable Time divided by
 - Total Available Time, calculated on a monthly basis.
 - Total Available Time – 24 hrs per day for seven days a week excluding planned downtime

- Unavailable Time - Time involved while the solution is inoperative or operates inconsistently or erratically.

Uptime Percentage	Penalty Details
A >= 99.5%	No Penalty
99.0% <= A < 99.5%	2% of cost of monthly maintenance charges
98.5% <= A < 99%	5% of cost of monthly maintenance charges
A < 98.5%	Penalty at an incremental rate of 1% (in addition to a base of 5%) of cost of monthly maintenance charges for every 0.1% lower than the stipulated uptime

The uptime percentage would be calculated on monthly basis and the calculated amount would be adjusted from every subsequent quarter payment. The SLA charges will be subject to an overall cap of 10% of the Monthly Maintenance Charges and thereafter, Bank has the discretion to cancel the contract. If Vendor materially fails to meet an uptime of 99.50% for three (3) consecutive months, the Bank may have the right to terminate the contract. In case if there is no pending invoices to be paid by the Bank to the vendor, the vendor has to submit a pay order / cheque payable at Mumbai in favour of Indusind Bank Ltd. for the same within 15 days from the notice period from the Bank.

Availability Service Level Default

- ♣ Availability Service Level will be measured on a monthly basis.
- ♣ A Service Level Default will occur when the vendor fails to meet Minimum uptime (99.5%), as measured on a monthly basis.

ANNEXURE IV

IT Security Requirements

As per enclosed sheet.
